## "Friends of Combine World,

**It's November...how does that happen so fast?** Another harvest season has come and gone, and we hope it was safe and successful for everyone. It was a "grind" for us on the counter at Combine World, but looking back, it seems to have flown by.

I want to start by thanking everyone for your patience again this year. This season brought an outrageous call volume (that we are grateful for), we also lost two parts people near the start of the season, and had two of our rockstars on maternity leave so we weren't running with our usual full squad. Our team this year consists of a lot of people who have only had one harvest under their belt, so I wanted to give them a shout out! The workload was huge and seemingly never-ending but they really did it. That being said, we did receive a lot of "constructive feedback" regarding wait times for call backs this year...we know... Lord, do we know. It was not uncommon for us to be 50-70 calls behind throughout the day. We tried our best to make sure everyone got a call back by the end of the day, but we understand that people might have fallen through the cracks and we apologize for this. We want to help, and we are doing what we can to make sure we are better equipped and prepared for next season! That being said, please give me a call/text (306-380-2282) or shoot me an email (sheri@combineworld.com) if you have any feedback for us from this season, we really do appreciate the good and the bad as it's what makes us better!

We have a busy slow season ahead of us! We have a huge racking project to tackle in our main warehouse in the next few months. Putting up more racking, getting more organized, means quicker service when it's go time and more parts to carry when you need them. Early Orders: getting parts ordered in time for next season and making sure we are getting the best quality parts at the best price for you, our customers. Pre-pulling: the yard guys are going to be busy forever. We are going to be pre-pulling, organizing, and storing fast moving used parts for next season! Hoping having a lot of these parts

off will mean less of a wait time for you when you need something. Those are just a few things to mention off our mile-long list, but please know we are doing everything we can to be better for you next season.

Speaking of better for next season...if anyone out there has had any issues with our Pea Augers / Draper Drums, please contact us. We need to know about any issues so we can fix them / make them better etc. Seems like the Draper Drums from this year have been good, but some from last season had some issues with the shaft that runs inside the drum. We think we have everything addressed and fixed but that's only because we haven't heard otherwise, so please let us know if you experience anything unfavorable. We would really appreciate it!

We are going to sound a little different when you call into Combine World. We got an upgrade to our phone system, and it DOES start off with an automated voice message. If I am being honest, I hate those, but with it, comes some VERY cool call stats. Showing us how many calls our team mates take, how long they spend on each call, and how many calls are incoming. All this information is important and useful so we hope it doesn't throw a wrench in the service we can provide you!

I think that just about wraps up this edition of The Scoop! Thanks for listening and we hope to see you soon!
